WOOD MOISTURE METER DELMHORST

J-Series Meters Offer Superior Accuracy and Reliability

Each **Delmhorst J-Series Moisture Meter** can be used with the integral electrode pins or with any Delmhorst electrode. Case with built-in handle puts controls at your fingertips, making one-hand operation fast and easy.

Each unit has a maximum measuring depth of 5/16" and includes a durable carrying case, instructions, extra sensor pins and a 9V battery. All are made in the USA.

ESPECIFICACIONES TECNICAS:

- **J-Lite Moisture Meter (No. 222052)** provides accurate readings at an economical price. It detects moisture content in a range of 6–30% from one of 12 bright LEDs that are easy to read—even in direct sunlight. Includes a reference table for quick species corrections. 3-year warranty.
- **J-4 Analog Moisture Meter (No. 152449)** detects moisture content in a range of 6 to 30% on an analog readout.
- **J-2000 Digital Moisture Meter (No. 222053)** is designed for those who need to know the exact
